

Disability services.
Putting you first.

On February 7 we had a meeting.

This meeting is called our **Human Rights
Advisory Committee meeting**

This is what we talked about

We want to have a better **culture**

Culture is about

- our values they are things that are important
- how we do things so we support you to be who you want to be
- how we think so we make sure you come first
- how we behave so we are kind to every one

We asked Aruma participants what they think we need to do.

Having a strong culture means having great support staff.

We talked about what a great support worker looks like, they

- listen to you
- let you do things for yourself
- help you reach your goals
- give you privacy
- treat you well
- are not on their phone when they support you

We talked about the NDIS not paying for some services like

- art
- music
- sex workers

Support Coordinator will change to Navigator to keep track of how NDIS money is spent.

We want to make sure people get the NDIS funding they need to live a good life.

We talked about how **racism** can affect people

Racism is when people treat you badly if you

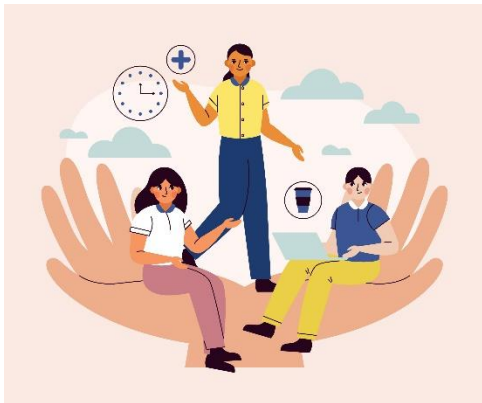

designed by freepik

- come from another country
- have a different religion
- look different
- talk different
- have different skin colour

We want to make sure there is no racism at
Aruma we will

- talk about how this makes you feel
- train staff
- make sure this does not affect you
- celebrate how people are different

We want to make sure people are supported
if they find a job.

We want to make sure families and staff work
well together.

- We will write down how to do this

What we want to do this year

- let people know what to do if they have to talk with the Police.
- tell people what we do at these meetings
- invite people not from Aruma to come and listen to us
- hold our human rights conference

Raise our human rights voice

- write to important people about human rights issues
- talk to important people about human rights issues

Thank you for reading
